

Korean Sun Pear
Pyrus fauriei 'Westwood'
 Rosaceae

Description

The Korean Sun Pear is, as its name suggests, native to Korea. It's a great specimen tree for small yards, beds. In the spring it's covered in white, fragrant flowers. The green, summer foliage turns a beautiful flame red in the fall. Small, inedible pear-like fruits develop in the fall as well and provide food for birds and other small mammals throughout the winter months.

General Information

Zone: 4-8	Soil Texture: Clay, Loam, Sand	Fall Color: Orange, Red
Height: 10-12	Soil pH: Acidic-Alkaline	Bloom Color: White
Width: 12-15	Exposure: Full Sun	Bloom Time: Spring
Habit: Rounded	Water Needs: Average	Fragrance: Yes
Growth Rate: 24" per year	Soil Drainage: Well-Drained	Fruit Color: Yellow
	Other Attributes:	Fruiting Time: Fall
		Fruit Flavor: Inedible
		Attracts: Bees, Birds, Small Mammals
